

Kurzbeitrag

Vorkommen des Fadenmolches (*Triturus h. helveticus*) im Hünxer Wald bestätigt

BERND VON BÜLOW

Occurrence of the palmate newt (*Triturus h. helveticus*) in Hünxer Wood area (Germany) confirmed

The occurrence of the palmate newt (*Triturus h. helveticus*) outside the mountain and hill area has been described 1981 and 1983 in the herpetofaunas of Westphalia resp. Northern Rhineland (Germany). In 1994 these data were questioned; now they can be confirmed for 1996.

Key words: Amphibia, Urodela, newts, *Triturus h. helveticus*, distribution.
