

Fund zweier flavistischer Teichmolche (*Triturus vulgaris*)

BRIGITTE BENDER

(Fontanestr. 15, D-33719 Bielefeld)

Two cases of flavistic smooth newts (*Triturus vulgaris*)

Two flavistic (partial albinistic) adult smooth newt were found 1995 in Bielefeld, Germany, on it's way to the spawning pond. The eyes did not show any pigmentation, the body was generally coloured light orange with a light yellow shade ventrally, and toetops were toned a bit darker.
